

MODEL	ORDER CODE	DIMENSIONS	COLOUR	WEIGHT
MULTI-6 	CVEM6M	560x720x210mm	Brilliant Silver	30kg (Approx. depending upon the number of columns)
Battery Pack 	SBAT14	Replacement battery pack for MULTI-6		

COLUMN OPTION	ORDER CODE	TYPICAL APPLICATION	MAXIMUM PACK SIZE	
			WIDTH	DEPTH
1	CVEMCO	CONDOMS	65	75
2	CVEMFE	FEMCARE PACKS	90	70
3	CVEMTO	TOWELS	116	78
4	CVEMTA	TAMPONS	132	54

HOW DO I SELECT THE COLUMN SIZES?

The MULTI-6 can take up to six columns, three on either side of the central control board, depending upon the size of the product. Firstly determine which column option from the below table is most suitable for the product you wish to vend (eg: if you have a condom pack which measures 60x70x15mm choose Column Option 1). To ensure the columns you want to use will fit, add up the **high-lighted** products width from the columns selected. ***This figure must not exceed*** 197mm on each side of the control board.

Example 1

If you would like to vend 3 columns of condoms on one side of the machine, this would be 65mm+65mm+65mm=195mm.

Example 2

If you would like to vend 1 column of condoms and 1 column of tampons on one side of the machine, this would be 65mm+132mm=197mm.

Quality products made in Great Britain

MULTI-6
Versatile, reliable vending

The MULTI-6 from *magnum*

With the ever increasing demand for out of hours vending, washroom vending and novelty vending, the MULTI-6 has been designed and developed to satisfy these needs.

Four standard sizes of product column are available (to suit most condom packs, sanitary products, etc.)

however, special bespoke columns for larger sized products are available to order.

The maximum number of columns is six, depending on the product selected.

In order to maximise the stock holding capacity the product columns have been mounted vertically.

FEATURES

- UP TO 6 COLUMNS
- FULLY ELECTRONIC
- VERTICAL COLUMNS FOR MAXIMUM STOCK HOLDING
- DOUBLE LOCKING STEEL CASED UNIT IN BRIGHT SILVER

- EASY INTERCHANGEABLE COLUMNS
- BATTERY OPERATED – NO MAINS POWER REQUIRED
- 4 STANDARD SIZED COLUMNS AVAILABLE TO SUIT MOST PRODUCTS (SPECIALS AVAILABLE TO ORDER)
- COIN REJECT
- WAKE CIRCUIT TO PROLONG BATTERY LIFE
- OWN BRANDING AVAILABLE

OPERATION

The MULTI-6 is fully electronic. Simply insert the correct coins to the value of the product (£2,£1,50p, 20p, 10p/€2,€1,50c,20c). This value is then displayed digitally. To complete the vend, press the flashing button located next to the selected product (which is itemised in the product window).

SECURITY

As the MULTI-6 can be sited in many different locations, security was an important issue in the design of this machine. The outer case is manufactured from 1.5mm steel and is seam welded for strength and appearance. The unit is fitted with two 'push-to-lock' locks. Internally, the cash box has its own lock.

The electronic coin validator checks each coin for authenticity and denomination.

INSTALLATION

The lift off hinged front makes installation easy. Simply fix the chassis to the wall (six mounting points available), plug in the battery pack, locate the front cover back on its hinges and you are ready to go.

SET-UP

Once the columns have been selected for the appropriate products, each column can be priced individually and updated or modified as required. The MULTI-6 can be supplied already set up to your requirements. However, this can be changed at any time on site.

RE-STOCKING

Restocking is made very easy because of the hinged front cover. The electronic control system can register the number of products sold, total coin box value whilst also indicating an empty column by way of flashing LED buttons.

With the ever increasing demand for out of hours vending, washroom vending and novelty vending, the MULTI-6 has been designed and developed to satisfy these needs.
